Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on January 7, 2005 has been entered.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dr. Gwen R. Wood on April 12, 2005.

The application has been amended as follows:

In the claims,

In claim 62, line 7, the recitation, "and selected" was deleted.

Art Unit: 1638

In claim 63, line 3, the recitation, "transcription and translation regulatory sequences" was replaced with --said promoter--.

64. A transformation vector for conveying resistance to BNYVV to a plant, said vector comprising a DNA fragment consisting of a nucleotide sequence that corresponds to nucleotides 153 to 3258 of RNA1 of said virus, and transcription [and translation] regulatory sequences operably linked therewith.

In claim 68, line 4, the recitation, --RNA1 of-- was inserted before "said", and the term --transcription-- was inserted before "regulatory".

3. Claims 62-65, 67, 68, and 70-72 are allowed.

4. The following is an examiner's statement of reasons for allowance: The amendments introduced by Applicant in the paper submitted January 7, 2005 do not significantly change the claimed invention, as the amendments are consistent with the practice of the claimed invention. Claim 62 indicates that the BNYVV cDNA fragment is operatively linked to a promoter, which indicates that the cDNA fragment is transcribed. Claims 63, 64, and 68 were amended above to indicate, consistent with claim 62, that the BNYVV DNA fragment is operatively linked to transcription regulatory sequences and transcribed. Translation regulatory sequences are not essential to practice the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
